Experience

Full Stack Development Intern **May 2024 – July 2024**
Edba Academy (A Venture of Surfboard India) *Mumbai, India*

- Enhanced the UI/UX of the web application using **React.js**, boosting visual consistency and interactivity by 20%.
- Optimized front-end and back-end performance, reducing load times by 15% & improving system performance by 20%.
- Designed and integrated scalable RESTful APIs, successfully cutting data retrieval latency by 10%.
- Expanded platform capabilities by 30% by leveraging **Gemini APIs** to introduce advanced, AI-driven functionalities.

Education

Fr. Conceicao Rodrigues College of Engineering **Aug 2025 – Present**
B.Tech in Computer Science & Engineering *Mumbai, India*

Vidyavardhini's Bhausaheb Vartak Polytechnic **Aug 2022 – May 2025**
Diploma in Computer Engineering *Mumbai, India*

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C, C++, PHP
Frontend: React.js, Next.js, React Native, Electron.js, HTML, CSS, Tailwind CSS
Backend & DevOps: Node.js, Express.js, Flask, Google Cloud Platform (GCP)
Databases: MongoDB, Firebase, SQLite
AI/ML: Tensorflow, Pytorch, Vertex AI, Google Agent Dev Kit, OpenAI SDK
Tools & Platforms: Git, GitHub, VS Code, Linux, Postman, Vite, Expo, Jira, N8N
Soft Skills: Problem-Solving, Communication, Teamwork, Adaptability, Time Management, Presentation

Projects

Preso – AI Presentation Platform | *GenAI, React.js, Tailwind CSS, Framer Motion* **Vercel**

- Developed an AI-driven engine that transforms raw text into "Apple-level" aesthetic presentations, reducing time-to-first-draft by 10x compared to manual design.
- Optimized slide rendering logic to handle complex layouts in under 2 seconds, resulting in an 85% reduction in manual formatting effort for users.

dom-to-pptx – Open Source NPM Library | *TypeScript, CSS Geometry* **NPM**

- Engineered a high-performance library to convert DOM nodes to editable PPTX, achieving 99% visual fidelity across gradients, shadows, and complex layouts.
- Handled complex CSS-to-XML mapping for 50+ style properties, providing a lightweight alternative to server-side exports and reducing server costs by 100%.

Glyphify – AI Handwritten Document Digitizer | *React Native, OCR, Google Vision API* **GitHub**

- Built a cross-platform mobile app that digitizes handwritten notes with 95%+ OCR accuracy, bridging the physical-digital gap for 100+ beta users.
- Streamlined educational workflows by enabling instant document-to-text conversion, saving teachers an average of 5 hours per week on manual transcription.

Hackathons

DevHacks 24-Hour Hackathon | *Domain Winner – Best Project in Web Development* **Feb 2026**

- Developed **Empire Protocol**, a 3D browser-based strategy game with AI-driven dynamic events.
- Designed the web architecture and gameplay mechanics for real-time interaction and strategic decision-making.

State Level Hackathon - Code-A-thon | *Top 10 out of 670+ teams* **Feb 2026**

- SocialSense centralizes X, Instagram, FB, and YouTube management, streamlining ad campaigns and collaborator oversight.
- Fourteen AI agents automate workflows, including viral prediction, competitor tracking, and financial reporting.

Nation Level Agri-Tech Hackathon | *Top 5 out of 734+ teams* **April 2025**

- Developed an AI-powered platform to provide farmers with data-driven insights for crop and fertilizer selection.
- Integrated a computer vision model for real-time plant disease diagnosis and an alert system for weather changes.

Achievements

- **Winner** — MSBTE State-Level Technical Paper Presentation (2024)
- **Finalist** — MSBTE State-Level Project Competition (2025)

Publications

- **Windows Login Bypass Techniques - A Red Teamer's Perspective** — Indian Journal of Technical Education (IJTE)
